ACQUISITION
Fixed source domains; descriptions sealed before later contracts
Frozen native bank
Original components
Fixed parameters
Source observations
Amplitudes and effects
Incoming-context partials
Retained interfaces
Behavior across contexts
Reused across contracts
Query retained behavior
CONSTRUCTION
Requirement
Live state
Target/protected intervals
Compatibility
Forecast continuations
Rank completion or reuse
Native branches
Recompute live activity
Check actual constraints
Deployment
Selected program
Native witness
Observed state updates the search frontier
